

DARUN MUSTAFA

Full-Stack Developer · React · Node.js · TypeScript · Docker · AI/LLM

+46 79 300 73 95 · darunbjork@gmail.com · Stockholm · github.com/darunbjork · linkedin.com/in/darun-mustafa · darun.dev

PROFILE

Full-stack developer building production-grade systems in React/TypeScript, Node.js/Fastify, PostgreSQL, MongoDB, and Docker — with a consistent focus on auth security, API contract design, and real-time data. Specializing in production LLM integration: RAG retrieval pipelines, structured prompt validation, and AI-grounded backend architecture.

EXPERIENCE

Independent Full-Stack Developer

Self-directed · Stockholm

Jun 2023 – Present

- › Architected and shipped 5+ full-stack applications end-to-end — establishing the same auth, API, and deployment patterns across every project so each new build started from a proven baseline
- › Production auth from scratch: JWT + RBAC with refresh token rotation and role-scoped middleware across 3 projects — zero auth bugs post-launch
- › Enforced consistent API contracts with OpenAPI/Swagger on every backend; all frontend clients consume one standardized error shape

Personal Assistant / Night Shift Care

Stockholm · Part-time

2018 – 2024

- › Provided nightly personal care and support for a client with significant needs — coordinating care plans, schedules, and regulatory documentation reviewed by government authorities over 6 years

Earlier: Production Manager & Grocery Manager

Kurdistan Region, Iraq · 2010 – 2015

KEY PROJECTS

Research Assistant Platform

GitHub ■

Fastify · TypeScript · PostgreSQL/pgvector · Redis · Gemini API · Docker · OpenTelemetry

- › 640+ Jest unit tests with 82% line coverage enforced in CI — sub-800ms P95 latency on RAG queries
- › Hybrid retrieval: pgvector cosine similarity + BM25 keyword search merged via Reciprocal Rank Fusion for grounded, cited answers
- › Self-correcting ReAct agent loop with automated RAG Triad quality evaluation and retry logic

darun.dev — Portfolio Platform

GitHub ■ · Live Demo ■

Fastify 5 · Prisma 7 · PostgreSQL · Redis · Gemini API · React · Tailwind · Docker · Cloudflare Pages

- › Turborepo monorepo with shared TypeScript types — Argon2id + HttpOnly JWT + CSRF double-submit protection
- › Visitor fingerprinting with SHA-256, unique project view analytics, and structured Gemini chat with Zod-validated output
- › AI-powered job pitch generator — matches job descriptions to candidate profile, generates tailored cover letters

Smart Home Automation API

GitHub ■ · Live Demo ■

Node.js · TypeScript · MongoDB · MQTT · Socket.io · JWT/RBAC · Docker · GitHub Actions · Swagger

- › Full IoT real-time loop: MQTT handles device commands, Socket.io fans state to all clients in <30ms
- › Tenant-isolated RBAC at middleware layer — cross-tenant data access is structurally blocked, not just permission-gated

Chat App — React Native

GitHub ■

React Native · Expo · Firebase Firestore · Firebase Auth

- › Real-time mobile messaging with live Firestore listeners, authenticated user sessions, and push notifications

TECHNICAL SKILLS

Frontend

React · TypeScript · Tailwind · Zustand · Axios · Vite · React Native · Expo · Framer Motion

Backend

Node.js · Fastify · Express · WebSockets · MQTT · JWT/RBAC · Zod · BullMQ · Socket.io

AI / LLM

Gemini · DeepSeek · Grok · GroqCloud · Deepgram · RAG · pgvector · ReAct agents · Prompt Engineering

Databases

PostgreSQL · Prisma · MongoDB · Mongoose · Redis · Upstash · Supabase · Firebase Firestore

DevOps

Docker · GitHub Actions · Cloudflare Pages · Render · Heroku · Swagger/OpenAPI · Jest

Comms/Email

SendGrid · Resend · Twilio

EDUCATION

Fullstack Developer — Open Source Track

Chas Academy · Stockholm · Sep 2025 – Jun 2027

Full-Stack Web Development Certificate

CareerFoundry (Remote) · Jun 2023 – Aug 2024

Business Administration Diploma

Choman Technical Institute · 2011 – 2013

LANGUAGES

Kurdish — Native · English — Professional · Swedish — Professional
