PROFILE

Backend & AI engineer building production-grade systems in React/TypeScript, Node.js/Fastify/Express, PostgreSQL, MongoDB and Docker — with a consistent focus on auth security, API contract design and real-time data. Built five LLM-integrated projects using Gemini (four live), including a three-provider voice pipeline with Deepgram and ElevenLabs. Experience with multi-provider pipelines, hybrid RAG with quality scoring, Zod-validated output, token-budget enforcement and circuit breakers.

EXPERIENCE

Independent Software Engineer — Jun 2023 – Present
Self-directed · Stockholm

- Architected and shipped 8+ full-stack applications end-to-end (six highlighted below)
- Production auth from scratch: JWT + RBAC with refresh token rotation and role-scoped middleware; Argon2id and bcrypt password hashing
- Enforced consistent API contracts with OpenAPI/Swagger on every backend

Personal Assistant / Night Shift Care — 2018 – 2024
Stockholm · Part-time

- Provided nightly personal care and support for a client with significant needs — coordinating care plans, schedules, and regulatory documentation reviewed by government authorities over 6 years

Relocation to Sweden — 2016 – 2018
Stockholm

- Relocated from Kurdistan Region, Iraq to Stockholm, Sweden. Completed SFI Swedish language training and integration programme while establishing residency.

Production Manager & Grocery Manager — 2010 – 2015
Kurdistan Region, Iraq

KEY PROJECTS

Research Assistant Platform · GitHub
Express · TypeScript · PostgreSQL/pgvector · Redis · Gemini · Docker · OpenTelemetry
Hybrid retrieval (pgvector + BM25 via Reciprocal Rank Fusion). Multi-node agent workflow with quality scoring and retry logic. 640+ Jest tests, 82% coverage; Artillery load-testing.

voice-agent · GitHub · Live Demo
Fastify 5 · TypeScript · PostgreSQL · Redis · WebSocket · Deepgram · Gemini · ElevenLabs
Real-time voice pipeline integrating three providers. Per-provider circuit breakers with graceful degradation. Daily token ceiling with pre-flight budget checks and Sentry tracking.

darun.dev — Portfolio Platform · GitHub · Live Demo
Fastify 5 · Prisma · PostgreSQL · Redis · Gemini · React · Tailwind · Turborepo
Hybrid RAG chat grounded in own profile and project docs, self-maintaining embeddings via GitHub webhooks. Admin CMS, JWT auth, ATS source aggregation with AI-scored matching against my profile.

CleanNation · GitHub · In progress
Bun · Fastify · Prisma · PostgreSQL (database-per-service) · Redis · Kafka
Event-driven microservices platform — seven independent services, each with its own database. Argon2id, JWT auth, Redis-backed rate limiting.

Smart Home Automation API · GitHub · Live Demo
Node.js · TypeScript · MongoDB · MQTT · Socket.io · Gemini · JWT/RBAC · Docker
Full IoT real-time loop: self-hosted MQTT broker, Socket.io state fan-out <30 ms. Server-side Gemini for natural-language commands. Tenant-isolated RBAC.

DevQuiz · GitHub · Live Demo
React · Vite · Recharts · Bun · Fastify · MongoDB · Gemini
Gemini-generated quiz questions with per-user accuracy charts. Zod-validated Gemini output before it reaches the client.

TECHNICAL SKILLS

Frontend: React · TypeScript · Tailwind · Zustand · Axios · Vite · React Native · Expo · Framer Motion
Backend: Node.js · Fastify · Express · Bun · WebSockets · MQTT · JWT/RBAC · Zod · Socket.io · OpenAPI/Swagger
AI / LLM: Gemini (production) · Deepgram · ElevenLabs · RAG · pgvector · Agentic workflows · Prompt Engineering
Databases: PostgreSQL · Prisma · MongoDB · Mongoose · Redis · Firebase · pgvector
Observability: Sentry · OpenTelemetry · Jest · Vitest · Artillery · axe-core
DevOps & Security: Docker · GitHub Actions · Cloudflare Pages · Render · Turborepo · Argon2id · bcrypt · Helmet · CSRF

EDUCATION

Fullstack Developer — Open Source Track — Chas Academy · Stockholm · Sep 2025 – Jun 2027
Full-Stack Web Development Certificate — CareerFoundry (Remote) · Jun 2023 – Aug 2024
Business Administration Diploma — Choman Technical Institute · 2011 – 2013 (UHR-evaluated: SeQF Level 5)
